EMERGENCY APPEAL

Violation of the Nuremberg Code and Crimes Against Humanity

Ladies and gentlemen,

We are demanding from you an unprecedented decision which is justified by an unprecedented situation.

While the Corona measures are to be officially lifted in Israel, vaccinating the children is still up for debate. The vaccination propaganda does not abate, so people continue to be kept in fear and panic and thus under pressure. Nor has the announced continued vaccination every six months been called into question. Most importantly, people remain unaware that and with what consequences they are participating in a medical experiment. We will not be lulled into silence.

As the Nuremberg Trial was held in 1945, the war was over and the crimes committed during the war were condemned. Right now though an internationally orchestrated crime against humanity is ongoing and will take place until you condemn it.

We limit the justification for this urgent appeal to few facts.

1. The European Medicines Agency (EMA) in Amsterdam disregards its own disturbing Adverse Effects figures caused by the Covid vaccination. What is striking is the fact that most of the side effects hit the age group between 18 and 64 years.¹ Meanwhile the under-70 age group makes up about 90% of the population and, according to the October 14 2020 WHO bulletin, is not at risk from the virus - the death rate is 0.00 - 0.31%.² In other words, the experimental therapy causes the most serious side effects, injuries and death in the people for whom the virus did not pose a threat. And against this background, children are to be vaccinated, under the threat that otherwise they will be denied access to the education and/or under the heavy solicitation of governments officials! This said, that is simply untrue that endangerment by Corona justifies the catastrophic consequences of experimental vaccination. Referring to the factual situation evidenced herein, governments, media, authorities and pharmaceutical companies act with intent as all these facts are known to them.
2. It has become known that all gene-based COVID-19 vaccines can trigger blood clotting. **For this reason alone, their use is morally and ethically prohibited.** When clots form in vulnerable areas in the brain, spinal cord, heart, and lungs, disrupting blood flow can be irreversible and even fatal. The formation of clots in cerebral vessels causes severe headaches, nausea and vomiting, clouding of consciousness, nerve paralysis of all kinds, among other things. In other locations, vascular thrombi can have multiple life-threatening consequences.
3. The Oviedo Convention – the legally-binding international instrument for the protection of human rights in the biomedical field – states in Article 13:
“An intervention seeking to modify the human genome may only be undertaken for preventive, diagnostic or therapeutic purposes and only if its aim is not to introduce any modifications in the genome of any descendants.”
We have called all suppliers. No one was willing to assure that the current intrusion into the human genome has no consequences for the descendants nor data containing this claim are available. **This alone justifies an immediate halt to the vaccination campaign.**

4. Many recognized experts warned about Antibody Dependent Enhancement (ADE) months before the vaccination campaign. Their criticism often was met with political reprisals, censorship, slander and invariably with disregard. That alone is a crime, considering that these people were driven by concern for human life.

Now Nobel Prize Winner Luc Montagnier – who says about himself that he is old and a Nobel Prize winner and cannot be blackmailed – states that the vaccination curve is followed by the death curve, that the vaccinations are causing new resistant virus variants.³ He rates the current vaccination campaign as a scientific and medical mistake, calling it unethical. We, our children are not guinea pigs. Are yours?

5. The Pfizer paper with the title “Study to Evaluate the Safety, Tolerability, Immunogenicity and Efficacy of RNA Vaccine Candidates Against COVID-19 in Healthy Individuals”⁴ (the study is sponsored by the German BioNTech) states on the page 10 the time intervals to control the immune response as follows:

“...7 and 21 days after Dose 1; 7 and 14 days and 1, 6, 12 and 24 months after Dose 2.”

Fact is that in Canada and the USA at this moment children are being exposed to the experiment, followed by Germany and other countries. This happens less than six months after the start of the vaccination campaign and without minimizing risk by at least keeping to the given time intervals. **The vaccination of the children must be stopped and prevented immediately.**

To evaluate the risk our children are exposed to, please see additionally the attached report by Israeli People Committee as **Appendix 1** to this letter.

6. The aforementioned Pfizer document advises also on the possibility of an environmental exposure⁵ to the adverse events during pregnancy and breastfeeding as follows:

“8.3.5.1

A female is found to be pregnant while being exposed or having been exposed to study intervention due to environmental exposure. Below are examples of environmental exposure during pregnancy:

- A female family member or healthcare provider reports that she is pregnant after having been exposed to the study intervention by inhalation or skin contact.*

³ <https://youtu.be/RZGuTNhNxOE>

⁴ https://media.tghn.org/medialibrary/2020/11/C4591001_Clinical_Protocol_Nov2020_Pfizer_BioNTech.pdf#page9

⁵ Environmental exposure means in essences adverse reactions in non-vaccinated persons due to direct and even indirect contact with vaccinated persons.

• *A male family member or healthcare provider who has been exposed to the study intervention by inhalation or skin contact then exposes his female partner prior to or around the time of conception."*

This of course must be prevented as there more people get vaccinated there more are endangered directly and indirectly.

7. In Sweden, where anti-corona measures have hardly been applied, 14,275 people have died with Covid between February 2020 and May 2021.⁶ This is opposed by 30,000 reported side effects of the vaccination within four months.⁷ This correlation is universally applicable.
8. All measures are based on the Drosten-Test from Germany. This test is not valid for diagnostics⁸ and on top intentionally calibrated with 35 to 40+ Ct to produce up to 97% of false-positive results⁹ and thus to justify the experimental vaccination.

On the other hand, a Ct of 28 should be used in vaccinated people, due to CDC guidance.¹⁰

And so, you can generate results as needed with the Drosten-Test. This is a fraud that costs human lives and causes economic and social destruction. Anyone who knows, joins in, promotes or even has it granted participates in organized crime.

We will file a complaint in an appropriate manner. However, this cannot be dealt with, as in 1945, in the knowledge that the acute danger to humanity has been eliminated. We urge you to ensure that your decision is not too late. We expect the court to immediately ban the experiment with the COVID "vaccination" until serious concerns are carefully pursued.

Israel was founded in first place to give protection to those who survived the Holocaust. Some of them, the elderly Holocaust survivors, became the first to attend – without their knowledge and informed consensus – in a medical experiment which they might not survive and many do not. Please, give it a thought.

Jews represent just 0.2% of the world's population (for known reasons). What is happening in Israel has the potential for genocide. You have it in your hands to stop this.

⁷ <https://greatgameindia.com/side-effects-covishield-vaccine/>

⁸ Inventor of the PCR test, Nobel prize winner Kary Mullis about his invention: "If you do this right, you can find almost anything in anybody" but "... it doesn't tell you if you're sick" – <https://youtu.be/t2EHCmLjAE>

⁹ As of RKI (German federal government institute responsible for disease control and prevention): „A PCR result with a Ct value >30 provides a positive RNA detection with a low viral load corresponding to the high Ct value, which according to previous experience means loss of breeding ability." - https://corona-transition.org/IMG/pdf/rki_-_coronavirus_sars-cov-2_-_covid-19_entlassungskriterien_aus_der_isolierung.pdf

¹⁰ <https://sentinelksmo.org/cdc-maximum-28-ct-for-post-vaccine-covid-pcr-tests/>

According to the CEO of Pfizer Albert Bourla Israel became a world lab.¹¹ Please, at least make sure that the terrible experience that has been imposed on the Israelis is being used for the benefit of people all over the world.

Sincerely,

Ruth Machnes

Arie Suchovolsky

THE ISRAELI PEOPLE'S COMMITTEE
 ועדת החקירה האזרחית
 هيئة التحقيق المدني

Summary of the Israeli People's Committee's database regarding adverse events related to the covid-19 vaccine in Israel

Updated April 25th 2021

Category	Sub-Category	Number of complaints	Percent of total
Death	Sudden death	179	
	Death from cardiac arrest / heart attack	81	
	Death from stroke	16	
	Death from covid-19 after vaccination	11	
	Death from multi-system failure	7	
	Death from another reason	15	
			309
Gynecology	Vaginal bleeding	158	
	Menstrual Disorders	107	
	Miscarriage	41	
	Pregnancy hospitalization	10	
	Stillbirth	8	
	Endometriosis flare-up	4	
	Other (premature contractions, breastfeeding difficulties / Infertility / baby issues)	8	
		336	17.2%
Neurology	Stroke	69	
	Bell's Palsy	55	
	Neurological impairment (vertigo, paresthesia, Facial nerve palsy, paralysis)	67	
	Neurological-motor impairment (limb paralysis)	35	
	Seizure	16	
	Other (cognitive impairment, neurological-sensory impairment, neurological-cranial impairment, intracranial pressure, ageusia, ALS)	21	
		263	13.4%
Heart	Heart attack, Myocarditis	159	
	UNS	7	
		166	8.5%

Pain	Limb pain	49	
	Extreme headache	44	
	Myalgia	28	
	Back pain	27	
	abdominal cramps	19	
	Other (chest pain, bone pain, joint pain, fibromyalgia flare-up)	11	
		178	9.1%
Lungs	Pneumonia, Pulmonary edema, Pleural fluid	87	
	Dyspnea	1	
		88	4.5%
