

OPEN LETTER TO THE MEDIA FROM HOLOCAUST SURVIVORS AND DESCENDANTS

After the shocking news reached us that the state-funded media has accused Professor Sucharit Bhakdi of being an anti-Semite, we decided to write this letter. We stand behind Professor Bhakdi because he speaks the truth.

You, the media, have lied to the people for years by preaching false lessons from the Holocaust. That is not the lesson of the Holocaust, that Jews must not be killed or questioned. No human being should be killed!

The lesson of the Holocaust is that you must not stand by and participate when a minority is persecuted. They have instrumentalized the Holocaust for the opposite: to deprive people of the will to stand up against injustice. And in this godless way you have prepared and are in the process of implementing a new Holocaust.

We expressly warn that another holocaust is unfolding, only bigger and more sophisticated. The brutality with which you fight, deny, hurt and humiliate the opposition, both verbally and physically, serves to suppress the truth. Destroyed livelihoods, apartment searches, occupational bans, forced referrals to psychiatric hospitals and worse - this could be the story from our lives, but this is the reality we observe in Germany.

We will not be silenced

Dr. Bhakdi did not do anything wrong.

He merely suggested that the term Vaccination Macht Frei is eerily similar to the Auschwitz Entrance slogan, which is entirely correct.

Please stop attacking this good man, who is certainly not an anti-Semite.

Rabbiner William Handler

Geboren in Satumare, Rumänien

Holocaust-Überlebender

I live because my grandmother disobeyed when it was ordered that Jews gather. As now ordered to get vaccinated oneself and our children.

I am alive because decent people disobeyed when they were forbidden to hide Jews. Just like now Sucharit Bhakdi and other decent people disobey to save lives.

To punish them with the term "anti-Semite" for this is an outrageous hypocrisy.

Mascha Orel

Meine Großeltern und meine Mutter waren aufgrund ihrer jüdischen Herkunft in Bergen-Belsen, ich bin zwar nicht religiös, dieses Erbe begleitet mich aber seit meiner Jugend und ich reagiere bei Antisemitismus in jeder Form sehr empfindlich. Wer Prof. Bhakdi aufgrund einer unglücklichen Formulierung als Antisemiten bezeichnet, hatte noch nie mit Antisemiten zu tun. Man macht das

wohl mit dem Ziel, diesen menschlichen und emotional engagierten Wissenschaftler auf der persönlichen Ebene zu diskreditieren. Dagegen möchte ich meine Stimme erheben. Was auch immer das wert ist.
