

Declaration against experiments on human health

I, [your full name]

hereby declare my explicit non-consent to any experimentation on human health, including those promoted by the International Health Regulations (IHR), geoengineering and the 5G network, citing the Nuremberg Code (1947) and ethical statutes based on it.

The Nuremberg Code (Trials of War Criminals, Nuremberg, 1949 -

https://www.loc.gov/rr/frd/Military_Law/pdf/NT_Vol-II.pdf) - calls for voluntary, informed consent for medical experiments (point 1) and the avoidance of unnecessary risks (point 4).

The Declaration of Helsinki (World Medical Association, 2022 -

<https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/>) emphasizes the protection of human health and the need for scientific evidence before experimentation. These principles are violated by the following practices:

1. **international health regulations (IHR):** The IHR promote gain-of-function research that artificially makes pathogens more dangerous without sufficient safety guarantees. This poses incalculable risks to humanity, contrary to the Nuremberg Code.
2. **geoengineering:** The spraying of substances such as aluminum, barium, etc. takes place without long-term studies on health consequences (Geoengineering Watch, 2024 - <https://www.geoengineeringwatch.org/documents-2/>). This violates the ethical duty to scientifically assess risks.
3. **5G network:** Studies on the 5G network are limited to thermal effects, but ignore non-thermal effects such as cellular damage. Without comprehensive research, this is an inadmissible experiment on the population.

I hereby refuse to consent to these interventions, as they are being carried out without my informed consent and violate the ethical principles of the Nuremberg Code (Trials of War Criminals, Nuremberg, 1949) and the Declaration of Helsinki (World Medical Association, 2022). I demand transparency, independent research and an immediate stop to such experiments.
